Amputated Arms Full Game! Online Game - FREE DOWNLOAD!.Q: How to show all the rows in datagridview to a textbox in c# using wpf? Hi I am having a textbox called txtDatatable. I want to show the data of datagridview in this textbox which has the databinding property. The datasource of datagridview is a data table. Xaml Code:- Code Behind:- private void Window_Loaded(object sender, RoutedEventArgs e) { this.dgvAvail.DataContext = objDatabaseAccess.GetAll(); } And I want to show all the rows of datagridview in this textbox. I have tried the following: private void Window_Loaded(object sender, RoutedEventArgs e) { this.dgvAvail.DataContext = objDatabaseAccess.GetAll(); txtDatatable.Text = this.dgvAvail.ItemsSource.Count.ToString(); } But it shows only one row. A: Instead of this, you can use foreach private void Window_Loaded(object sender, RoutedEventArgs e) { foreach(DataRow datarow in this.dgvAvail.ItemsSource){ txtDatatable.Text += datarow.Field("name") + "\r "; } } or if you don't want to add any name in the textbox, you can also use datarow["name"].ToString() instead of datarow.Field(" 3e33713323
