AVG Driver Updater keeps your drivers up to date and can help you to prevent errors or crashes. In addition to regular checks, AVG Driver Updater can also perform update and backup operations. AVG Driver Updater provides an updated hardware profile from the cloud and can collect information about Windows updates and software. It provides a detailed chart with information about hardware drivers, showing a comparison of the version installed on the target system and the latest one available from the cloud. It can back up drivers and can be used to backup and restore driver packages. AVG Driver Updater includes a clean interface. There are two options at the top right of the window: 'Backup' and 'Check'. Under 'Check' a button is displayed to start the search. Developed by Avast, the Avast Driver Updater is a simple tool that performs a systematic check of the installed driver on the system and let's you know if any driver has expired and needs to be replaced. The latest version of Avast Driver Updater can detect driver versions by scanning the online database of the Avast product manager in a matter of minutes. The result of the scan will be displayed in a list view, which shows you the type of error - hardware or software - and which driver is associated with the error. The advanced view allows you to update, clean or restore. There are two buttons at the bottom: Update and Clean. Clicking on the Update button updates the driver. Clicking on the Clean button deletes the current driver. Features: Updates outdated hardware drivers Keeps the system updated with the latest drivers Keeps the system updated with Windows updates Reduces system crash due to hardware errors Backup and restore drivers and other software to an ISO file Scan computer in one click Optimized for Windows 8 and above Are you tired of having to manually update your drivers to stay safe? For that reason, the Avast Driver Updater is here to make your computer life much easier. The Avast Driver Updater is the perfect tool for all computer users who like to keep their system safe and secure. When the Avast Driver Updater is used to update and check the drivers, it's not only able to keep your system safe and up to date, but it's also able to recognize when your system requires software and hardware updates, which makes it so
