## Autodesk Revit Live 2019.2.1 ((FULL)) Free Download Latest Version

01 Feb 2019 - random message "revit cannot access file [filename].dat" is copied to this file. . I made sure that users create a new local file every morning. I checked that all databases are updated every 5 minutes and that files are checked every day. For several days I couldn't access the file from Revit, even though I created it and placed it in /etc/revit/bases. To solve this I had to delete the entire file, then rename it, then paste it in, then edit. In Revit, I could only edit with the right mouse button and editing commands like /usr/share/revit/editor/chmod a+x or something
