This was due to the fact that during this period, people did not yet know what viruses were. Thus, we can say that during this time, the company has earned a reputation as a reliable, fast and convenient way to create backups. Evolution Enterprise Systems is one of the leading companies in the world in producing data backup systems. In addition, the company produces a wide range of software for data protection and recovery. The company's solutions can effectively solve problems for companies of any complexity. The backup system is vital for our users. It's no secret that any copying, even a single one, can have irreparable consequences. Therefore, we recommend creating and maintaining a backup of important data at all times. And if you are planning to buy a new tablet, we recommend reading our review on the best smartphones under 10,000 rubles. To create a backup, select the "Add Backup" option. With this option, you can create separate backups for apps and data in the Camera app for later recovery. Depending on the source and type of data you select, the "Camera app can create different backups. When the app completes the backup, it displays a notification. For information on how to create a backup, see "Learn more about the Camera app" on page 19. 19. Once the backup is complete, the Camera app can create multiple backups and save them in a specific directory. To restore a backup saved in a different directory (backup category), select it in the backup list and click Restore. If the application supports multiple backups, when you select a backup you will be shown a dialog asking whether you want to keep the backup in the same directory as the one you selected previously or move it to another directory. Select one of the options: "Save to the same directory" or "Move to another directory". In the first case, the previous or the next backup will be saved in the same directory as the selected one.
