You can then edit the new layer to do whatever you like with the photo. You can selectively draw on the layer, apply color correction and color balance tools, flatten all or some of the image's layers, and even create a new type of layer that allows you to blend image information from one image layer to another. Creating and editing layers is discussed in Chapter 6, "Photography with Adobe Lightroom." After you finish editing the photo, you can export it in the desired format (JPEG, TIFF, etc.), in case you need to save it in a format other than
