It is a racing game where you compete against your friends and foes. You need three to eight people to play in a local multiplayer game. You can compete one-on-one, two-on-two, or one-on-one with a friend or two on the same device. Before you start the game you can see which races will take place and decide which of the three cars you want to play with. There are twelve events with six races each. In every race you need to complete three checkpoints to reach the final spot. Depending on the number of participants (3, 4, 5, 6 or 7) the game starts with a random map that looks like this. The game currently has two modes. 1. Fixed races. In this mode the terrain shape and track layout remain the same for every race. The number of checkpoints and the starting position of the checkpoints is adjusted. It means that the game moves faster because the number of checkpoints is increased. 2. Random races. In this mode the terrain shape and track layout are randomized each time. The number of checkpoints and the starting position of the checkpoints are the same for each race. It means that the game is slower because the number of checkpoints is decreased. Formed in January 2011, the company is headquartered in Toronto, Ontario, Canada. In August 2014 Caveman Studios acquired Skorpika, Inc. the creators of Skorpios, a casual strategy puzzle game. Skorpios is a playful game of strategy and tactics to train the brain cells. Combining a unique blend of card games and mobile puzzle games, players start with small armies of worms supplied by the opposing team and are given orders or hints to battle it out in many game modes. A strategic blend of games in the Card & Board, Role Playing & strategy genres, Skorpios is available on iOS, Android, PC and Web. Caveman Studios is also working on S.L.I.

The adventure game "Khaba" follows a boy named Michael who embarks on an adventure in order to discover the deep secret hidden in the dark pyramid of Khaba. Instead of being buried under the pyramid, the boy is trapped inside and will have to solve a series of 27 puzzles in order to escape. We've crafted this game in a clever way in order to allow players to choose the various paths that the boy can take. The level design will vary according to the pathway followed, but the danger will be no less. Khaba is a very large pyramid, with many secrets to uncover. The boy must find all the necessary clues in order to get out of the pyramid. It's an eerie feeling going through each room, and as you move deeper into the pyramid, the dangers become more and more threatening. Living in a post-apocalypse world, you are the last survivor of your town. Do you have what it takes to survive? Mist of the Undead is an endless zombie survival game. Spawn in with a handgun, survive as long as you can. Killing enemies will award you money. Money can be used to purchase and upgrade weapons from purchase boxes. Purchase ammo, armor, and a speed/jump boost. Purchase boxes are spawned in as the rounds progress, so you must survive a few rounds before being able to access all the purchase boxes. Each weapon can be upgraded an infinite amount of times, upgrading weapons will increase the clip size, the reserve ammo, and up to a certain point the fire rate. For specific weapons that are not already a 1 shot kill, upgrading a specific amount of times will turn those weapons into 1 shot kills as well as all the other normal upgraded attributes. Purchasing ammo will give the player ammo for the weapon they are holding. The ammo pickups will give ammo to all weapons as well as grenades. The armor purchase gives the player armor that increases the damage they can receive by 100%. The speed boost increases the player's speed by 2.5 times allowing the player to zoom around the map and jump from almost one side to the other. Player's can pause the game at any time and adjust the sound and graphical settings, settings can also be accessed from the main menu. Game is equipped with a tutorial that walks players through controls and basic game-play components. This is my first project as a solo developer. Any reviews, feedback or bugs experiences would be very helpful; please email the account listed. CODE: CAB: Gameplay Comp - Gif of game art - Tutorial video - ===== CODE: CAB:
