The AutoCAD R14 program is a desktop application intended for use by professional and semi-professional CAD operators, as well as civil engineers, architecture, and construction professionals. As of 2017, AutoCAD is used for the design and drafting of architectural drawings, blueprints, and technical schematics for use in the design, construction, and maintenance of products and facilities. An AutoCAD user can create objects and draw lines, arcs, circles, polylines, and curved surfaces, and insert and edit objects, text, tables, and grids. Unlike some CAD packages, AutoCAD's CAD drawings are non-destructive, meaning objects can be easily deleted or modified without permanently altering the drawing. AutoCAD is available as a desktop or browser-based software application. Depending on the license level purchased, AutoCAD can be used to create, modify, analyze, and print all kind of 2D or 3D drawings. Since AutoCAD is designed to run in a Windows environment, the application is aimed for PC users who are working on windows-based computer systems. In addition to Windows, AutoCAD can also run on Mac OS, Linux, and Unix platforms. The AutoCAD R14 program, its templates, and the full AutoCAD R14 website can be downloaded from Autodesk's website. comment, UC Berkeley did not offer a specific statement. Instead, a university spokesperson said this: "We recognize that many of our students, and their families, are facing an uncertain future, and we stand ready to help." There are two things that strike me about this statement. First, the university spokesperson said "We recognize that many of our students, and their families, are facing an uncertain future." That's a loaded statement, because in order for this student to be looking at the future, he or she must have a present, and until we have a present, we have no future. Second, the university spokesperson chose to use the term "families." But if the university is encouraging these students to stay in college and they need families to help them, who is this hypothetical family? The university is making it seem as though this student is alone in a confusing world, when it fact, there is family in this world, the students family, and the rest of America's family, the parents. The university is making this student seem like he or she is the only one who needs help, when in fact, thousands of other students are facing similar circumstances and the university has hundreds of programs, services and resources to provide help. If the university is sincere in its desire to help these students, then why is it making the effort to shame students and their families for needing help? I've been an advocate for change for too long not to speak out against the UC system's discriminatory practices and inhumane treatment of its students. Our political representation has failed us. Our state government and the UC system are corrupt. We deserve better. But we deserve better and ca3bfb1094
