Document exchange formats Autodesk Exchange format (DXF) is the native file format for exchange of CAD drawings between AutoCAD Serial Key and other programs. It is also the file format used to transfer a drawing from one computer to another using CAD's built-in file transfer application (AutoCAD LT or AutoCAD Architecture). If a DXF is sent to an external system it can be translated to the file format of that external system, typically either DXF or DWG (depending on the external system's capabilities and version of Autodesk CAD). DWG is used to exchange a drawing between applications within AutoCAD. DXF can be used as well, but the DXF file created when using the DWG export can contain errors if the DXF was created in a separate application than the DWG. AutoCAD Architecture (A) format AutoCAD Architecture is a proprietary CAD format used to exchange design data between AutoCAD and other applications. It is a binary file format that allows clients to exchange geometry and attribute information, as well as place and dimension information. A is an enterprise-level format used to exchange large volumes of data, especially between AutoCAD and third-party CAD applications. A is a multi-part file that is compressed and encrypted using the proprietary AES-256 algorithm. AutoCAD Architecture Exchange format (AEX) is a format used to exchange design data between AutoCAD and other applications. AEX is a binary file format that allows clients to exchange geometry and attribute information, as well as place and dimension information. AutoCAD Civil 3D Exchange Format (ACIF) AutoCAD Civil 3D Exchange Format (ACIF) is a binary file format that allows exchange of design data between AutoCAD Civil 3D and other applications. AutoCAD Exchange Format (CAEF) AutoCAD Exchange Format (CAEF) is a binary file format that allows exchange of design data between AutoCAD LT and other applications. The CAEF file format is proprietary. 3D Exchange Format (3DX) 3D Exchange Format (3DX) is a binary file format that allows exchange of 3D geometry between AutoCAD and other applications. A 3DX file format is proprietary. Textile Exchange Format (TXF) Textile Exchange Format (TXF) is a binary file format that allows exchange of textured and shaded surface geometry between AutoCAD and other applications. What's New In?

Command line variables, like KEEP_WITHIN_VIEWPORT, can now be edited via the command line. This means you can change values programmatically, or quickly add them to your script. Changes to the resolution setting can now be made by percentage or whole numbers, and settings can be saved to a script. The New Menu system has been revised to be faster and simpler. Color and alpha composite drawing methods can now use custom gradients for both texture and transparency. Line drawings now use an auto-guess method to determine what type of line. Line styles now provide a visual guide to their thickness. Edit objects: The AutoCAD.exe, AutoCAD Map and AutoCAD Print command line tools now have a toolbox that contains many of the drawing tools. The Keyboard Shortcuts dialog box includes a tab for the Drawing Model tab. The Drawing Model tab has new options for snap alignment, 3D snap, and math snaps. The grid setting can now be saved to an object and saved to a script. All drawing tools have been updated to support the new drawing methods. Rapid design for efficient creation: You no longer need to choose between Drafting and Design views to create a new drawing or compare existing drawings. New commands, like ENT_TURN_VERT, automatically switch between the two when working on a drawing in design mode. (video: 1:32 min.) Rapid dimension creation from selected geometry and setting properties, and the 3D coordinate system are all now in the Design tab. The new Free Transform tool lets you quickly scale, rotate, translate or skew an object. Organize drawing elements: Sorting, grouping and filtering elements is now much faster. You can now edit the list of objects in the Object Info window. SVG is now supported in the Organize dialog box for most objects. The 3D Align and Align to Points tools can align two objects to any coordinate system. You can now save the list of objects in the Edit Groups window. Print settings now include a range of print types. You can now print to PDF from the Print dialog box. Fonts now appear with the correct spacing in the drawing. Sc
