**Beskrivelse The 'Voltron' cubes are the fruition of years of secret engineering and secrets passed down from Solaria's founding fathers. Patterned after cubecrafting, the 'Voltron' cube is a work of art, and one that has the only true advantage over cubecrafting: No flames. It's a testament to Solaria's success in trapping the power of the sky with Earth's colors of Earths I've made. A fine representation of Sagecrafting can be found in Starcatraz, the city guarded by the Voltron Force. The finer details on the cubes can be discussed as a separate question. Stellar Pearls - Each 'Voltron' cubes' will have two kind of gems. Besides the physical gems seen with real cubes, they will also have a 'planetary spirit' cube. Physical gems are an old custom, and can always be used with or in spells. Planetary spirit cubes come straight out of astromagic. Stratagems - Each 'Voltron' cubes will come with three Stratagems. These are special items that can be imprinted on your cubes, including both physical and planetary spirits. T-Series or Keyes cipher - The base tile of the whole set, the mosaic jump tile that helps create the cube's bottom. The cubes are designed to be as stable and balanced as possible. This is to maximize the cube's effectiveness in battle. The smoothing marble on the face of the cube is used to enhance gameplay, as well as creating a polished & waxed look.
