## Fifa 22 Activator For Windows

Major changes are coming to FIFA's AI. The team is introducing a new technology that will simulate the action of up to 30 players and break through the limitations of previous generations of AI. Our new AI-based player model synthesises the high-intensity actions and movements of players. It is the result of a long collaboration that began as early as FIFA 13 and has been on-going for the last few years. It will allow us to create smarter, more aggressive, and more dynamic AI in the game. Leipzig is the first location we will publish high-level content and is truly at the heart of German football. The city is located in the former East Germany and has a rich history within German football, with the presence of local club VfB Leipzig and its neighbouring first division side Borussia Dortmund.

Leipzig's recent surge in football culture has been celebrated as Germany's fourth most "Footballcally-Liked" city. The region of Leipzig has a thriving night life and is famously well-connected to Berlin and Western Europe. The Leipzig region is home to the Leipzig Games Convention, one of Europe's leading trade shows for computer games, as well as the longstanding Funk Radio Station, one of the longest-running electronic music radio stations in Germany. The city is also home to the famous Blue Series, the Premier League's first electric Kia Series in ePrix racing. The series is a collaboration of the British Formula E with FIA World Endurance Championship. The EASL will provide the local organising committee in Leipzig, giving the region a large prize purse, while BGI and German Ministry of Economic Development will increase the number of medals and ticket sales for the event. "We're thrilled to have the opportunity to host our first FIA Motorsport Games in Germany," said Peter Gerber, CEO of the EASL. "Leipzig has an incredible track record in motorsport and it's wonderful that F1 is returning to the region after a more than 30 year hiatus. We're excited to bring the best drivers in the world to Leipzig to compete in FIA Motorsport Games, and I have no doubt the city will continue to be the hub of German motorsport." The FIA Motorsport Games 2019 will be held from August 23-26. More information, including ticket and accommodation

### **Features Key:**

- **The best football ever** - Every time you play the Pro Evolution Soccer series you engage in your most intense, highest intensity football match imaginable, from set pieces to crosses, through to headers and dribbling and finishing. Because of the increased pace, size and

---

creativity of real-life football, it's important to adapt how you play to counter the increased physicality of the opponent. Decision-making, reacting and playing mindfully to make the most of every second of the game is the trademark of PES.

- **New set pieces** - The dynamic of set pieces in the Pro Evolution Soccer series has been revolutionised. Control the air by managing your run-up based on how your opponent reacts to set up passes around the opposition box, or lead longer, more successful headers up the pitch. Finally, new Touch Controls make your strikes straight from the kick-off a cinch, with accurate finesse off both feet possible from anywhere on the pitch. And, for the first time ever, players like Cristiano Ronaldo (exclusive), Neymar and Lionel Messi are also available to add some stylish flair.
- **Influenced and more aggressive AI** - Playing with realistic AI provides players with an almost superhuman performance. The new Highlight Motion Technology has been applied to the AI to adapt to the dynamics of every match. It allows the AI to see the movement of players they should use for a pass, changing direction in a flash just as you would if you were acting under normal conditions. Players must watch their footing on the pitch, understand high intensity and adapt their movements to overcome quick reactions. The ultimate in simulation!
