## SIGuardian Free Download [Win/Mac] (Updated 2022)

SIGuardian is the most advanced hard disk health monitor available. Based on S.M.A.R.T. technology, SIGuardian enables you to determine the remaining lifespans of your current hard disks and enables you to make individual changes to your hard disk's parameters before the final failure of the HDDs. SIGuardian works with Windows and has three modes of operation -  Basic - for beginner users  Advanced - for advanced users  Advanced + - for users who want advanced ADVANCED - The following features are available:  Can determine the remaining lifetime of your current HDD using S.M.A.R.T. attributes  Can examine different types of HDDs supported by S.M.A.R.T.  Shows you about individual changes in S.M.A.R.T. attributes  Shows you the remaining lifespans of your HDDs' subsystems  Can make changes to your HDDs to extend their lifespans ADVANCED+ - The following features are available:  Can analyze all S.M.A.R.T. attributes for all HDDs  Can view all S.M.A.R.T. attributes of all HDDs (Ex. Sector Counts for current HDD)  Can view all S.M.A.R.T. attributes of all HDDs by specific subsystem (Ex. Current HDD)  Individual control of all S.M.A.R.T. attributes  Can view all S.M.A.R.T. attributes of all HDDs by specific subsystem (Ex. Current HDD)  Can make changes to any S.M.A.R.T. attribute to extend HDD lifespans Be sure to activate the drive in Device Manager before you use this utility or a warning about extra low RAM will occur. To easily uninstall SIGuardian, open the Start Menu, type "uninstall" in the search box and select it. After you have uninstalled SIGuardian, all changes will be lost. However, if you have not yet begun to backup all of your data, you may be able to recover data lost from a failed hard drive using Windows tools.

### SIGuardian [Win/Mac]

Thanks to this software you will be able to keep hard drives healthy and avoid any data corruption. SIGuardian is able to analyse the number of hard disk failures and malfunctions. You should have a special look into it because the S.M.A.R.T. attributes are always changing. If you are a PC owner who want to make sure that their HDD is in good condition, do not hesitate a moment to use this unique tool that protects your data and allows you to make backup copies. If you are a professional or experienced computer user, you are sure that SIGuardian will make your day easier, because it does not only show the number of hard disk failures, it also controls which S.M.A.R.T. attributes are displayed. SIGuardian also has a variety of features and options. You can adjust:  Show S.M.A.R.T. attributes according to HDD manufacturer.  S.M.A.R.T. attributes shown per hard disk or all connected hard drives at once.  Show status information per S.M.A.R.T. attribute.  Displays or not aggregate information per S.M.A.R.T. attribute.  Shows the number of hard disk failures or only the number of malfunctions.  Automatically warns you when S.M.A.R.T. attributes change, e.g. when drive test mode is executed.  Automatically opens a log file.  Delayed warnings can be enabled/disabled.  You can adjust the days of warning.  Reset and re-start function that allows you to resume waiting for the number of hard disk failures. It is a really powerful utility to extend HDD life and avoid any hard disk malfunctions. Getting Started: - Click the "Download free version" button and installation starts automatically. - Once the installation is complete and the S.M.A.R.T. attributes list is displayed, close SIGuardian to stop the program. - Run the program once to install the main application and create the necessary registry entries. - Run the program every month to check hard disk health. - Check the S.M.A.R.T. attributes on hard disks not on computer where the program
