detailed DMCA notice please see [here](#).ено, но работает по созданию таблицы при условии, что пользователь ввел значение по которому создается массив. Значение должно объявляться точно именно таким ключом, а не просто \$id. Q:

how to read ini file via c# code string line;

```
StreamReader sr = new
```

```
StreamReader("C:\\MyFile.ini"); line = sr.ReadLine();
```

i want to read ini file in c# that contains i want to read ini file with c# code and how to read ini file in c#, that contain may key word values A: It would be quite easy to use a parser like INI4C.NET. The syntax of a.NET INI file is quite easy. In general, it's like this [section1] key1 = value1 key2 = value2 ... So, your code to read a.ini would be something like this :

```
string [] myValues = { "MyFirstSection",  
"MySecondSection", "MyThirdSection",
```
