Sumple Tutorial: A game where you control a fish that was kidnapped by a serial kidnapper. But here is where the game's fairytale plot part comes in. The killer has not only kidnapped the fish, but the fish is also pregnant, and its baby has been sold to a witch (the kidnapper). The goal of the game is thus to escape with your fish. Features: - simple arcade gameplay - a story part in the game where you get to control the fish and the fish-baby - the fish is named Chuuu - you can tap to either swim/jump - game is great on any mobile device (iPad,iPhone,Android etc.) - the game is very fun and an easy game to pick up and play - you can play together with a friend in a multiplayer mode, or you can play alone through the game - you can pay to beat each level or even unlock all of them - there are easy to get achievements and other game features - you can listen to an introductory short story in the beginning of the game, just tap the pink bell under the title of the game - help out other fish by fishing to earn coins - tap the black button to help the fish, and if you tap quickly enough the fish will tap to swim faster StoryIntroduction: This game is a casual game, not an RPG game. It is a game about fighting hunger. The fish are a species that lives under the sea. They eat decaying plants and creatures, but when the wind blows, they can't open their mouth. So they need to open their mouth by pressing on a light, or a button. This is the exact middle of the story of the game. Gameplay: You are a duck with a vacuum cleaner, which is your mouth. You want to catch bugs and eat them, and you need a button and lights to eat them. Content:The game is simple. Additional information: You can tap to move around, and tap the button to fire. Story:The first sign of the cataclysmic change was the flood. The waters rose and washed away everything in their path. The people of the valley, however, were stranded on the giant raft, which they built to escape. After many years, when the water subsided, the land was green again. The people

An action-adventure game with elements of RPG, stealth and platforming. The story is based on the game "The Gunman. In that game enemies has come back after the player, and tried to take part of the world. In the end they wont be able to take part, because they will be shot and burned at the end of the game, but if you feel like getting revenge, you can. There is also an ending that will lead you to see a darker side of the game, or maybe a weaker one. The game can be very challenging, but do not take it to difficult. Just take a step back from the moment when you felt like you need a break, is just fine, and try to do better the next time. If you do that, you will always be able to make progress in the game and also reach good scores in online leaderboards. Enjoy it! Key Features: RPG element: You will be able to carry experience points to build your skills to make them more powerful. Stealth element: Enemies can track you, they will be able to alert other enemies to your presence, and at the end of the game you will be able to kill people if you want them dead. Difficulty: Different paths, more enemies, more traps, more enemies... It will be easy, medium, hard, difficult and end of the world. Random and in-game events: Enemies will not always stay in the same spot, if you take a left instead of a right turn, enemies will be there. Game difficulty: You can do it your way or you can use all of your skills to get a better run. And if you don't like difficulties, there is a normal difficulty, a hard difficulty and an impossible difficulty. Customization: You can customize your character with different weapons, costumes and plenty of bonuses. In vivo experiments have shown that tumor derived substances, such as growth factors, inhibit normal cell growth and effect the movement of a tumor cell or the adhesion of an endothelial cell to various matrix molecules. The hypothesis of this project is that these substances can also influence interactions that occur in the blood between tumor cells and normal cells. It has been determined that these substances are present in the serum, and that different classes of lymphocytes (T cells, B cells, monocytes, neutrophils, and platelets) differ in their ability to bind the various soluble growth
