Our first game was released in 2015 with a focus on collaborating with other indie studios to create original games. Holding On is a game about two sides of the same coin. On the one hand, we are on a mission to survive, but on the other hand we are also on a mission to save each other. We worked very hard to allow for a survival mode and map design that would allow for players to survive. Hold Out: Take Control is our second title and it's a survival game about taking control and surviving in a run and gun zombie world. Trapped Within is a visual novel game that takes you through a maze room by room, showing you various scenarios and making you make decisions to proceed. You can progress through the game by talking to characters and offering hints to your friends. Each room has a few rooms which will not be safe to enter and you will encounter a number of traps, including dropping walls and spikes. All of these things can prevent you from escaping the room, so you must pay attention to them. Do not get stuck in a room if it seems like it might be a dead end. Your choices will affect the ending and the room you are in, so try to be an attentive player. You can improve your experience by giving hints to your friend and choosing the correct dialogue options. The gallery at the end shows screenshots from the game. Try and match the rooms in the photos with the rooms you experience. If you have any questions or would like to say hello, you can find me at twitter.com/Groovygame or email me at groovy@groovygame.com.
