## What's new in Albert's Journey:

Why do you need to call the highlander? If you like callbacks to 1970s B-movies, you might've heard the Highlander series of movies. They share something with Journey... Wherever there's a guy... Death gets him faster. I've always loved this script from 1991 for the Courage Industries WRAB episode. I also think it's exciting to spot a resemblance between the leaders of different countries which has been common since ancient times. The game's name is a tribute to this cult series. Today, probably only some 40% of those who even watched a single episode of the first season might know the title 'Coming at You Live' from the episode (in color of course). In the first episode, a British operative is poisoned by a super-scientist who is of non-human origin. He is injected with a poison that will create a microscopic time machine. With the hope to travel back to the time before the poisoning. The explosive concept comes from an indie short game I created in 2012 inspired by the BBC-series. I used the Scotsman Lairon to travel from the present to a different location in 1960 and came out of the way back in 1963. It's a pretty complex quest with some hand to hand combat to save various Engineers who are being kidnapped and taken to a parallel world. Mostly it's a puzzle game, but also has some typical platformer-elements. For the new journey, things went quite differently. I've lost my love**
