I am using the nppdired project for this and it is only capable of sending text via whatsapp to android devices. How can I add support for PC's or other OS's? My code is here : The files I am using for this project are those here : Note: I am not a developer and I am only trying to study how to do this. If anyone can help out this will be greatly appreciated. Thanks in advance 10-05-2013, 11:20 PM irnoda You need to use either the nppdired 1.9.7 or above version, as both the latter and the former versions use libcurl, and libcurl is only available on Linux. 10-05-2013, 11:32 PM jorrit @Brian Knight said "Note: I am not a developer and I am only trying to study how to do this." I think he/she should mention this in the readme file. There is plenty of examples that show how to use this project to control other hardware, like mouse or keyboard. Eg. 10-05-2013, 11:34 PM marcel Not a developer.
