BEST OF 2011: The Best Images of 2011.Q: Is git reset --hard suitable for creating an optimal commit history? I can imagine a scenario where a hacker would create a commit for some important thing and then later commit another "super dangerous" commit for a new secret feature while they're both in the same branch. While I know that if you do that, you can reset your branch and have a clean branch to start from (without the hacker's secret), I'm wondering if it would be okay to use git reset --hard while there's already a lot of commits
