Roblox is an online game platform and game creation system developed by Roblox Corporation that allows users to program games and play games created by other users. Created by David Baszucki and Erik Cassel in 2004 and released in 2006, the platform hosts user-created games of multiple genres coded in the programming language Lua. For most of Roblox's history, it was relatively small, both as a platform and a company. Roblox began to grow rapidly in the second half of the 2010s, and this growth has been accelerated by the COVID-19 pandemic. The content in Roblox is classified into the following three main categories: Person (known as User, Robloxian, or Robloxian Citizen), Place (known as Room, Game, Map, Mob, Land, Field, Theater, or Playground), and Object (known as Minigame, Content, Item, Chiptune, Music, Funny, Picture, or Project). Person can create a house, room, or area to host games, where a user can locate and interact with the Object. User can customize the environment, interior, and exterior of the Game, and place the Object in that game. In addition, Game objects can interact with each other and User objects. Users can play and interact with other User objects in the same room, in the same Game, or across different Games. User can also play Minigames, either with pre-written content or their own custom-generated content. A Story Mode game is played after a user has registered to Roblox. A Story Mode game is hosted and controlled by Roblox, and cannot be edited by the User. In the Story Mode games, the purpose is to complete a series of tasks, win a set of rewards, and then unlock access to a special career, activity, or area, and these special features are not available in the solo play mode that is accessed after a new user has registered. When starting a Story Mode game, the User is prompted to create a Main Character (or Kids), who is the player character in the game. The Main Character is a fictional, personable avatar that will be the user's Player Object. User can switch between the Main Character and the Game's other Players. A User can only play as one of the Characters in the Main Character's game. A Lazy Mode game is played when a new user attempts to start a new Story Mode game in the Member's Lobby. Lazy
