Artificial Girl 3 Megapack 168 Characters 269 Clothes

I'm going to start uploading the characters and clothes. Essentially the clothing and accessories are already there. With no need to set the clothing because this game has a built in clothing display. I'm guessing they're going to be all offline for the time being. I'll try to upload a larger image later so you have the option to see the clothes in a more defined way. As you can see, the game has a simple basic interface that allows you to click on all of the items at the top of the screen. Click on the characters and you'll see the same things you see in any game. Click on the 3rd character, for example, and you'll see a visual representation of the character. In general, I tried to pick clothing that would reflect the fairytale theme of the game. The simple coloring on the clothes serves to help the character fit in the world - and they still look great. I also tried to keep the overall outfit color consistent from character to character. That being said, I did make some mistakes that I learned from. Please keep in mind that these are alpha versions of characters. Once the player selects an episode, they can manipulate the character through the camera, then travel along the story line. Much like previous AG games, the camera will move with the character. Look closely at the video and you'll see that the camera is transparent and as you look through the character, you're looking at the real world from inside the video. It sort of recalls the N64 Wario Land: Super Mario Land style world. I tried to get all the characters looking natural, as if they were in the real world. 5ec8ef588b
