Hp Compaq 8200 Elite Pci Serial Port Driver Win7

September 13, 2017 - Resolved: I noticed an exclamation mark next to "other devices" "PCI Serial Port" in the device is 6320136 on my HP 8200E SFF PC. I suspect this is related to that the drivers, etc. are not configured properly. For this reason, I removed all drivers for all devices until the computer crashed. It was like a black and white screen. Except that I couldn't turn off the PC. So I opened Device Manager on my desktop and selected Computer Management in the top right corner and although nothing was showing up in Device Manager Task Manager was there and it was working. 0946cee1be
