gimmee a second to fix my oppo clone xs max phone, it looks like a old ladies purse. it's like a leather aged long enough that the leather is brittle and has started to crack, and the lining is starting to come out. the phone is a mess, i'm not even sure i can fix it. i know it's your issue, and you're probably thinking about throwing the phone out the window. but before you do that, let me recommend you a flash firmware with file name r11 plus flash file firmware firmware 1000% tested. this flash file firmware is 100% tested on oppo clone xs max, r11 plus, oppo f5+. when i first downloaded the oppo clone r11 plus flash file firmware firmware 1000% tested, i had to install the flash file firmware on my oppo clone xs max phone, the flash file firmware had an issue where it would not install. i tried using different flash file firmware, and each time i would get the same problem. so i decided to move on to the next flash file firmware. i later found out that all of the flash file firmware i have tried had a similar issue. after that, i was unsure if i wanted to keep trying to figure out the issue or if i should just get the flash file firmware that worked. flash file firmware is the operating system of the device, it is like a windows or mac operating system. but unlike windows or mac, it is not a system that comes preinstalled on the device, it is loaded onto the device. with flash file firmware, you can do more than just play games, watch videos, use apps, and browse the internet. with flash file firmware, you can even unlock your device's bootloader.
