There is not a single book that can be referred to when studying the theory of Bharatanatyam. Most people follow the slokas, hasta vini yoga and anga bedhams given in this book. But these techniques were not entirely suitable for teaching Bharatanatyam. These techniques are intended for students who have been practicing for some time and have reached a fairly high level, as well as for people who already know Bharatanatyam and who want to achieve a great degree of harmony in their asana, and for those who study Bharatanatyam as a form of physical and mental discipline. In the next chapter we will explore these techniques in more detail.
