mods.carladia at war (custom spawns) warband with endless possibilities, one of the best moddable tactical rpgs out there and you can't even beat out the battle mechanics. bannerlord doesn't have the same character customisation options as warband or out of the abyss. it's up to you to take charge and create a character that you're proud of. you can also play out battles as a team of your friends or even fight them in a game of go and maybe even take them to court if you're too good. find it on nexus mods.warband maxfaction mod warband is brilliant, but it's also very expensive. if you like it but have less than \$2,000 to drop, this mod will let you play with the more manageable rules and a faction of 100. if you want to create a min-maxed army, you can do that too. it's easy to turn your existing warband army into a 100-faction one or you can create your own custom faction to bring in new units and powers. download it from nexus mods.warband minifaction mod warband is the most popular moddable tactical rpg around and the mods for it are legion, but the warband mod that is most popular with the community is one that drastically lowers the price of the game. since it works by extending the rules of the game, any mod that has to do with the game rules is not included in the price, making warband one of the best deals in moddable strategy games. find it on nexus mods.warband minifaction mod
