KeyMacro is a simple utility which allows you to put your macro's in a single text file. The functionality can be found under the "Macro" tab and you can keep it on a USB key or send it to others. The tool offers a wide variety of command line options for you to play around with but it only offers a single basic option that is the standard to use, which is "loadfile". The application offers you the ability to load files from the hard disk or a network share into the UI. It is a simple operation but it could still take a while. The loading process can be combined with the use of a text file which contains your commands in the form of macros. Once the file is loaded, the user has to follow a simple workflow that consists of pressing a few keys and entering the desired command. The application has a simple and intuitive user interface that helps you remember what command to use for which object. Like many other tools, KeyMacro offers you several options in the "Settings" tab, but it also comes with some very useful features like undo/redo buttons, volume control, the ability to select from different fonts, etc. You can also provide a shortcut to a program like AutoIt, which is basically the command line of that tool. This way, the user does not have to input the command from scratch and get some unexpected result. KeyMacro is a simple utility with simple to use user interface that allows you to put your command line macros in a text file.
