Next to babble about file formats in this article is no doubt the one of the most common ones- what to do with RAW vs JPEG. You can apply fill across the entire image or just apply the content to an individual portion of an image, depending on how you need to use that content. And if you fill an entire image with noncreative content, such as a logo or an image of a map, you can quickly remove it in just a couple of clicks. If you have Photoshop CC 2021 and you need to upscale an image, you can now use a preview from your Adobe Speedgrade 2 with 2x and 4x upscales available.
