Key Macro is a program to generate strong and easy-to-remember passwords for users. It can be used to get better passwords for your programs and accounts. It has three ways of generating passwords, which is giving you the option to:
Generate passwords of any length from 1 character up to 26

characters Generate random passwords or set seed, which makes it possible to reuse the same password for different accounts (super hack) Generate custom passwords based on your own idea of what your password should be. The software makes it easy to edit the generated password (including characters, words, and special symbols).

How does Key Macro work: -

First you choose how long you want your password to be. -

Generate random or custom passwords. - Then you edit your password and pick a character

set (from A to Z, special symbols, numbers,...). - Finally you start typing the characters of your password. Features: * More than 100 character sets * Modify password, including: changing character set, adding or removing characters * All possible characters, from A to Z * Custom character sets * Random passwords or seed * Editing a password * Password length from 1 to 26 characters * Tools to create a strong password
