In addition, there are numerous structures for various housing openings which are typically covered by a shell or frame surrounding the opening. Generally, structures such as these will be aesthetically pleasing to a user in that they prevent the user from seeing the housing opening. In addition, some of these structures prevent undesired smoke and heat from exiting the housing through the opening. Still further, many of these structures prevent the smoke and heat from entering the housing through the opening. Accordingly, an object of the present invention is to provide an inexpensive smoking accessory which is aesthetically pleasing to a user. Another object of the present invention is to provide an inexpensive smoking accessory which allows a user to view the flame without taking their eyes off of the pipe. A further object of the present invention is to provide an inexpensive smoking accessory which allows a user to view a flame without having to look at the flame. Yet another object of the present invention is to provide an inexpensive smoking accessory which is compact, and provides a shield against heat and smoke. Another object of the present invention is
