To see why this is the only photo and video editing app to make the top of my list, check out the video review above and read why **you should definitely check this high-quality software out**. I discuss why Adobe Photoshop has been my go-to tool for years and hope you will find it to be the same. It's powerful, intuitive, and full of potential and new features. Like a lot of people, I had seen the first Lightroom versions and was quite satisfied with them. The addition of the Memory Preview in Lightroom 5 = JPG preview + 35% more memory and the Speed Preview and the ability of the Speed Preview to optimize the editable portion of the photo (does not work with RAW) = Huge Enhancement. I haven't tested with RAW so I don't know if the Memory Preview will function with RAW, but either way, the Speed Preview seems the best improvement with RAW as Lightroom has learned from Photoshop. I will end up picking up Lightroom for the ability to do pivotal edits and tight grain removal, more so than I would purchase Photoshop. But yes, I do believe that if you are not a Photoshop user but only use RAW, Lightroom 5 is worth a serious look. I am still using Lightroom 3 and 4, but I do like my new Speed Preview. I haven't used Lightroom 5 so I don't know how else it is better than the previous version, but I like it and am very happy with the Lightroom 5 RC. By upgrading from 4 to 5, the memory consumption increased by 35%, thanks for the great support! I see a lot of people saying that Lightroom 5 has no features while good people like yourself are always looking for ways to help others. Keep up the god job! Now, if you had a way that this beta could help me get rid of the red eye, I would be singing the blues. I especially need help with skin softening for use on Indian movies.

We've tried to make this seamless, so when you select a photo from your local hard drive, it instantly appears in Adobe Camera Cloud. **What It Does:** The Fill tool, formerly the Paint Bucket tool, fills any solid area with the color of your choice. It's great for solid backgrounds or coloring large areas. It can also be used to apply patterns to your images. The Final Step: That is one of those staples that every person uses in their everyday life. Whether it be something like ordering take out or ordering your food at a restaurant, you never really know what the final product is going to look like. Guess like most things in life, the best camera is the one that you have with you. It is always good to have video documentation of everything in the work flow to share with others or help make additional details easier for you.
